

DS250NV

SATELLITE SET-TOP BOX FOR VIASAT

Technical specification

SATELLITE SET-TOP BOX TECHNOLOGY FOR THE HOME

The DS250NV is Pace's third generation satellite set-top box for Viasat.

The DS250NV delivers MPEG-2 standard definition programming at the highest possible quality for today's discerning consumer, together with interactive services, such as online gaming and red button applications, via the integrated modem.

With a faster processor – 240MIPS – and higher security than previous generations, the DS250NV delivers high quality at the right price.

All of this is achieved within the EU Code of Conduct for Energy Efficiency guidelines with less than 15W consumption during operation and less than 8W during standby.

SUMMARY:

- Pace's 3rd generation satellite set-top box for Viasat
- Integrated modem for interactive services
- Increased processor speed and higher security
- MPEG-2 standard definition
- Complies with EU Code of Conduct for Energy Efficiency

SOFTWARE:

- DiSEqC 1.0 and support for SatCR
- NDS VideoGuard CA
- OpenTV Core 1.1 middleware
- Software download via satellite into Flash memory supported

EPG SCREENS

REAR VIEW DS250NV

CONNECTIVITY:

- RF Input (IEC169-24 F-type, female)
- RF output
- Analogue Audio (RCA Phono/Cinch)
- Optical SPDIF (TOSLINK)
- V22 modem with RJ11
- TV SCART (IEC60807-9)
- VCR SCART (IEC60807-9)
- Smartcard interface (ISO7816)
- Mains Input (IEC60320)

TECHNICAL SPECIFICATION:

- DiSEqC 1.0 and satCR
- DVB-S compliant 950-2150MHz satellite tuner (QPSK)
- MPEG-2 MP@ML, MPEG-2 MP@HL
- AC3 (Dolby Digital Stereo) throughput to SPDIF
- Audio MPEG-1 layers 1, 2, 3 (MP3)
- Support for Macrovision copy protection 7.1
- IR-remote control

MEMORY:

- 4MB FLASH
- 16MB SDRAM
- 16Kb NVRAM (FFS)

POWER:

- Mains supply voltage 195-265VAC, 50-60Hz
- Consumption <15W during operation and <8W standby

MECHANICAL:

- Dimensions 270mm x 160mm x 40mm
